

## Assignment 4

Assignment date	3 September 2022
Student name	J.Usha
Student roll no	951319104052
Maximum Marks	2 Marks

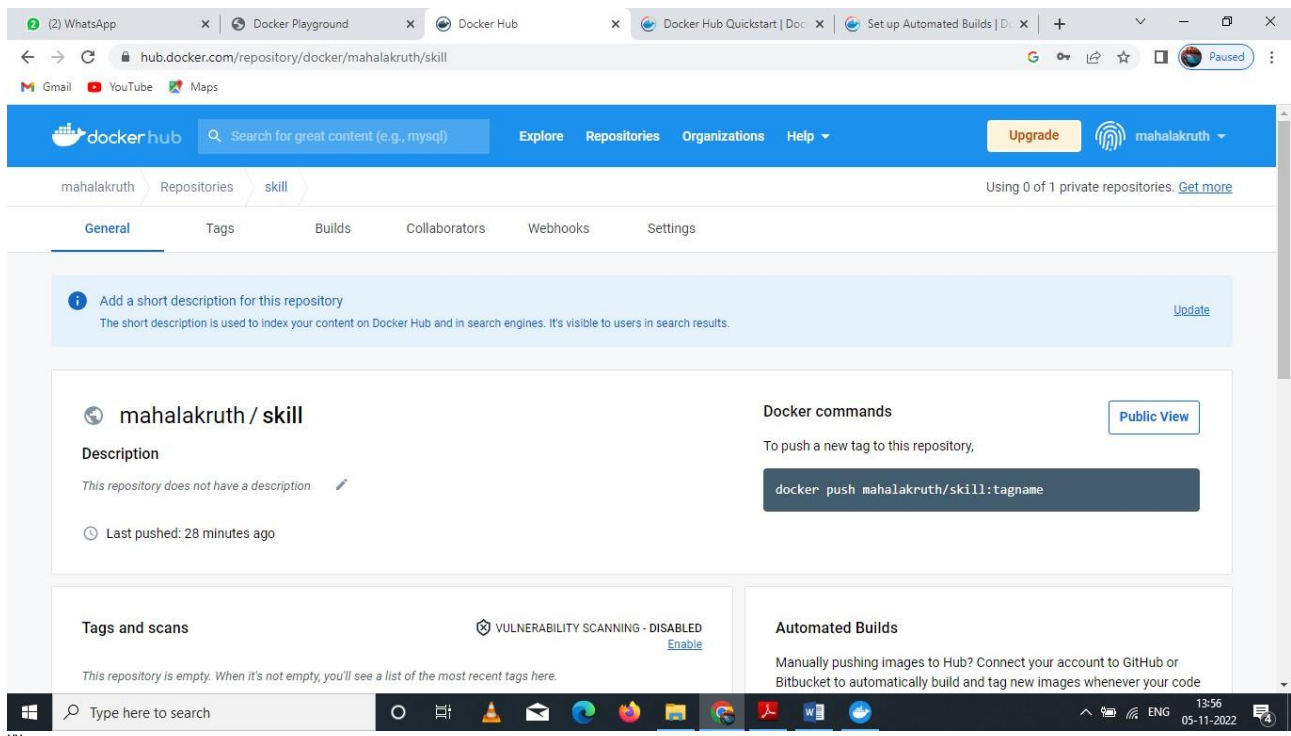

### Question 1:

Pull an image from docker hub and run it on docker playground.

### Solution 1:

```
docker pull uifd/ui-for-docker
```

```
docker run -d -p 9000:9000 --privileged -v /var/run/docker.sock:/var/run/docker.sock uifd/ui-for-docker
```

## Docker playground:

The screenshot shows the Docker Playground interface in a web browser. The top navigation bar includes links for (2) WhatsApp, Docker Playground, Docker Hub, Docker Hub Quickstart, and Set up Automated Builds. The main content area displays the session ID 'cdj1c1m0\_cdj1cam0qau000fq8ud0' and its IP address '192.168.0.18'. A 'CLOSE SESSION' button is visible. Below this, there's a section for 'Instances' with a '+ ADD NEW INSTANCE' button and a list of instances, including '192.168.0.18 node1'. The right panel shows session details: IP '192.168.0.18', Memory '1.47% (58.86MiB / 3.906GiB)', CPU '0.57%', and an SSH command 'ssh ip172-18-0-25-cdj1c1m0qau000fq8ubg@direct.labs.pla'. There are 'DELETE' and 'EDITOR' buttons. The bottom panel shows a terminal window with the following commands and output:

```
$ docker pull jenkins
Using default tag: latest
Error response from daemon: manifest for jenkins:latest not found: manifest unknown: manifest unknown
[node1] (local) root@192.168.0.18 ~
$ docker jenkins
docker: 'jenkins' is not a docker command.
See 'docker --help'
[node1] (local) root@192.168.0.18 ~
$ docker pull uifd/ui-for-docker
Using default tag: latest
latest: Pulling from uifd/ui-for-docker
841194d080c8: Pull complete
Digest: sha256:fe371ff5a69549269b24073a5ab1244dd4c0b834cbadf244870572150b1cb749
Status: Downloaded newer image for uifd/ui-for-docker:latest
docker.io/uifd/ui-for-docker:latest
[node1] (local) root@192.168.0.18 ~
$
```

## Docker UI:

The screenshot shows the Docker UI interface in a web browser. The top navigation bar includes links for Docker Hub, Docker Playground, and UI For Docker. The main content area displays the 'UI For Docker' dashboard with tabs for Dashboard, Containers, Containers Network, Images, Networks, Volumes, and Info. A 'Refresh' button is visible. The 'Running Containers' section shows a list of containers, including 'serene\_keller' which is 'Up 17 seconds'. The 'Status' section shows a donut chart with a green segment representing 'Running' containers. The 'Containers created' section shows a line graph with a peak at 1 on 04/11/2022. The 'Images created' section shows a line graph with a peak at 1 on 04/11/2022.

## Question 2:

Create a docker file for the job portal app or hello world app and deploy it in docker desktop app.

## Solution 2:

### DockerFile

```
Dockerfile - Notepad
File Edit Format View Help
FROM python:3.8
WORKDIR /app
ADD . /app
COPY requirements.txt /app
RUN python3 -m pip install -r requirements.txt
EXPOSE 5000
CMD ["python", "app.py"]
```

### Bulid Docker image

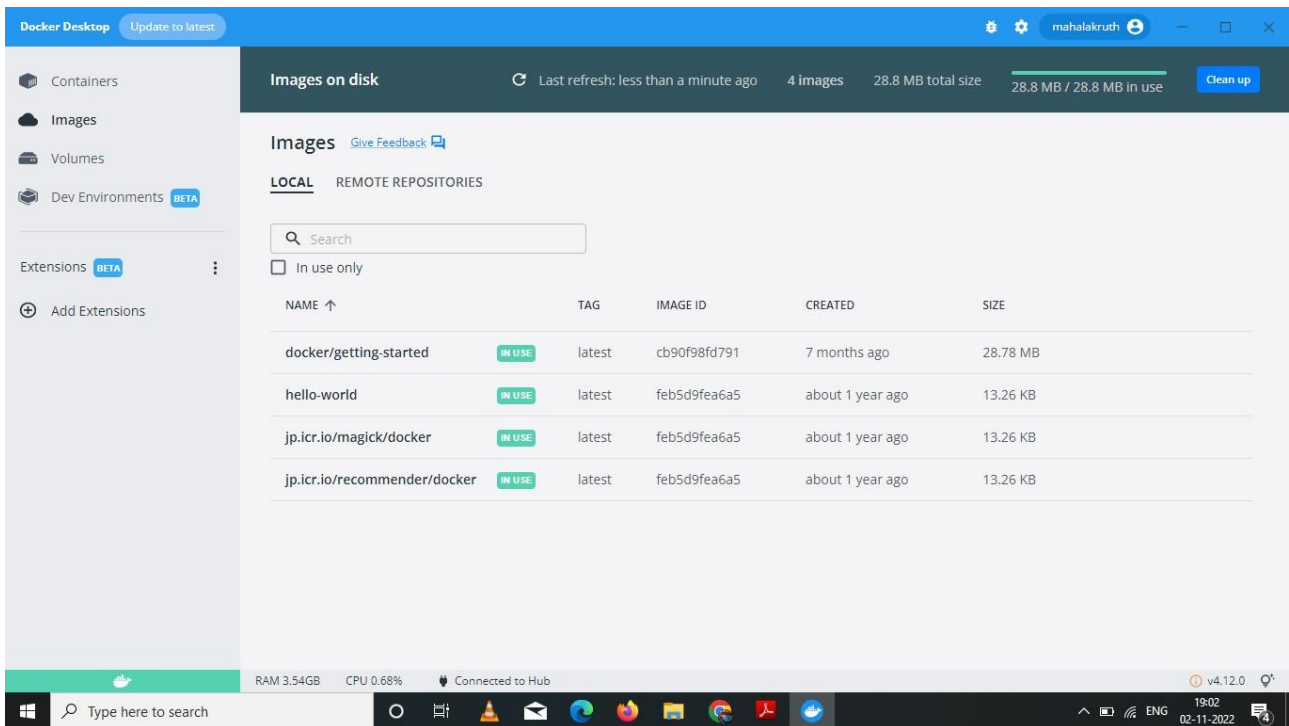

```
Windows PowerShell
PS C:\Users\SYSTEMS> ibmcloud login -a https://cloud.ibm.com

PS C:\Users\SYSTEMS> ibmcloud cr namespace-add magick
No resource group is targeted. Therefore, the default resource group for the account ('Default') is targeted.
Adding namespace 'magick' in resource group 'Default' for account Mahalakshmi M's Account in registry jp.icr.io...
Successfully added namespace 'magick'

OK
PS C:\Users\SYSTEMS> docker push jp.icr.io/magick/docker:latest
(2022-10-30T16:06:39.740411700Z)[docker-credential-desktop][W] Windows version might not be up-to-date: The system cannot find the file specified.
The push refers to repository [jp.icr.io/magick/docker]
```

## Deploy it on Docker hub

## Tested it using Docker playground

The screenshot shows the Docker Playground web interface. On the left, there's a sidebar with a digital clock showing 03:37:01, a 'CLOSE SESSION' button, and an 'Instances' section with a '+ ADD NEW INSTANCE' button. Below that, a list of instances shows one instance with IP 192.168.0.18 and name 'node1'. The main area displays details for the selected instance 'cdj1c1m0\_cdj1cam0qau000fq8ud0'. It shows the IP 192.168.0.18, memory usage at 1.23% (49.01MiB / 3.906GiB), and CPU usage at 0.46%. There are buttons for 'OPEN PORT', 'DELETE', and 'EDITOR'. Below these, a terminal window shows the following commands and output:

```
# is HIGHLY! discouraged. Any consequences of doing so are
# completely the user's responsibilities.
#
# The PWD team.
#####
[node1] (local) root@192.168.0.18 ~
$ docker pull mahalakruth/skill
Using default tag: latest
Error response from daemon: manifest for mahalakruth/skill:latest not found: manifest unknown: manifest unknown

$ dock
```

### Question 3:

Create an IBM container registry and deploy helloworld app or job portal app.

### Solution 3:

**My image link:** [au.icr.io/hello-world-app/hello-world](https://au.icr.io/hello-world-app/hello-world)

The screenshot shows a Windows Command Prompt window titled 'Command Prompt - docker push au.icr.io/hello-world-app/helloworldapp'. The user is installing the IBM Cloud Container Registry plugin. The output shows the plugin being installed successfully. Then, the user logs in to the IBM Cloud account. The output shows the API endpoint and the targeted account. Finally, the user selects a region (9) and pushes the image to the registry. The output shows the image being pushed successfully.

```
C:\Users\Monashree>ibmcloud plugin install container-registry
Looking up 'container-registry' from repository 'IBM Cloud'...
Plug-in 'container-registry[cr] 1.0.2' found in repository 'IBM Cloud'
Attempting to download the binary file...
11.90 MiB / 11.90 MiB [=====] 100.00% 5s
12476416 bytes downloaded
Installing binary...
OK
Plug-in 'container-registry 1.0.2' was successfully installed into C:\Users\Monashree\.bluemix\plugins\container-registry. Use 'ibmcloud plugin show container-registry'
to show its details.

C:\Users\Monashree>ibmcloud login -a https://cloud.ibm.com

**Question 4:**

Create a kubernetes cluster in IBM cloud and deploy helloworld image or jobportal image and also expose the same app to run in nodeport.

**Solution 4:**

<https://raw.githubusercontent.com/itsmona14/IBM-Assignment-cloud/main/deployment.yaml>

```
apiVersion: v1
kind: Service
metadata:
  name: hello-world-deployment
spec:
  ports:
    - port: 5000
      targetPort: 5000
  selector:
    app: hello-world
---
apiVersion: apps/v1
kind: Deployment
